Sub: Launch of New Software Application for Official Operations

I am pleased to inform you that the Wrestling Federation of India (WFI) is taking a significant step towards digitization by launching a new software application to streamline its official operations.

This software will facilitate an easy and efficient process for entering and receiving participant entries, as all necessary data will now be readily accessible within the system. The link to the software is provided below, and a password has been allocated to each affiliated unit for secure access.

All affiliated units are requested to use this software to submit team entries for National Events. Please be advised that the registration and closing dates are automatically locked after the specified deadline, and no entries will be accepted thereafter.

Software Link: <https://wfi-state.web.app>

Login Credentials: Provided individually to each affiliated unit

We appreciate your cooperation in ensuring a smooth transition to this new system.

J. K. Singh
